Monday, July 17	TRACK ONE: Management Focus	TRACK TWO: Info Security/Tech Focus
8³⁰ AM	OPENING REMARKS	
8⁴⁵ AM	<p align="center">OPENING KEYNOTE: The Tomorrow of Cybersecurity and Community Banking Dave Mahon, Chief Security Officer · CenturyLink Inc.</p> <p>As the chief security officer for CenturyLink since 2011, R. David Mahon is responsible for enterprise-wide security strategy, information security, cyber defense, critical infrastructure protection, physical security, network fraud and abuse, industrial security, international travel security, threat intelligence, workplace violence prevention, executive protection, and investigations. He serves as liaison with the National Security Telecommunications Advisory Council and National Cybersecurity and Communications Integration Center as well as federal and state law enforcement and homeland security agencies. Earlier in his career, he was a supervisory special agent with the FBI, responsible for investigating violations of federal statutes in which the internet, computer systems, computer systems and networks were exploited as the targets of terrorist organization, foreign government-sponsored intelligence operations, and criminal activities. During his career with the FBI, he managed programs related to white collar crime, crisis management, and critical infrastructure protection. He is a member of the US Department of State's Overseas Security Advisory Council, International Security Management Association, Telecommunications Security Association, Domestic Security Advisory Council, and Society of Former Special Agents of the FBI.</p>	
10³⁰ AM	<p>HOW MACHINE LEARNING AND BIG DATA IS IMPROVING EMAIL SECURITY John Devenyns, VP-Cyber Security Consulting · BAE Systems Applied Intelligence</p> <p>Email remains one of the top targets for cyber criminals worldwide. John will discuss why malicious emails go undetected and how a single email has the potential to shut a business down. He'll share best practices for protecting users from email-borne threats, and the ways big data and machine learning are being leveraged by next-generation solutions can protect against the latest attacks.</p>	<p>RISKS, REALITY AND REAL-WORLD STRATEGY Steve Sanders, VP-Internal Audit · Computer Services Inc.</p> <p>In his current role of internal audit department leader, Steve oversees the evaluation of risks associated with IT, financial and operational systems. He has strong knowledge of cybersecurity and privacy and an educational background in computer security and data protection. He holds a Certification in Risk Management Assurance and Certified in Risk and Information Systems Control, among others.</p>
11³⁰ AM	<p align="center">LUNCH AND SPONSOR BREAKOUTS: drill down, ask questions, and learn about solutions</p> <p align="center">11⁴⁵ to 12¹⁵ Darktrace 12³⁰ to 1⁰⁰ BAE Systems</p>	
1³⁰ PM	<p>SIX CRITICAL ANSWERS EVERY DIRECTOR SHOULD KNOW ABOUT CYBERSECURITY Steve Sanders, VP-Internal Audit · Computer Services Inc.</p> <p>A regular speaker at national conferences on info security and technology audit-related topics, Steve has facilitated the organization's transition to a comprehensive risk-based process and served as manager of CSI's eSecurity Consulting group. He blogs on a variety of topics related to technology, cybersecurity and the financial services industry.</p>	<p>THE ENTERPRISE IMMUNE SYSTEM Jesse Hood, Cyber Security Executive · Darktrace</p> <p>Discover how new machine learning and mathematics are automating advanced cyber defense; why 100% network visibility allows you to detect threats as they happen or before they happen; how smart prioritization and visualization of threats allows for better resource allocation and lower risk. Get real-world examples of unknown threats detected by 'immune system' technology.</p>
2⁴⁵ PM	<p>TRENDS IN CYBERCRIME Isaac Barnes, Assistant to the Special Agent in Charge · U.S. Secret Service</p> <p>What do highly publicized security breaches and big-company vulnerabilities mean for your bank and its reputation? Ike will break down what types of cyber crimes he's seeing on a national level, describe the various kinds (and motivations) of groups committing these crimes. You'll learn about the Colorado Electronic Crimes Task Force and its goal of combating electronic crimes.</p>	<p>FFIEC IT GUIDANCE AND IMPLEMENTATION Brian Brown, CISA, Senior IT Examiner · Federal Reserve Bank of Kansas City</p> <p>For the past seven of his 18 years with the FRB, Brian has focused on information technology exams of banks, technology service providers, and software products. His gift for distilling, clarifying, and putting complex ideas in context makes his presentations comprehensible and memorable for audiences of varied backgrounds.</p>
4⁰⁰ PM	<p align="center">REGULATORY ROUNDTABLE Federal Reserve Bank, Federal Bureau of Investigation, Office of the Comptroller of the Currency, and U.S. Secret Service</p>	
6⁰⁰ to 10⁰⁰ PM	<p align="center">EVENING ACTIVITY: COLORADO ROCKIES GAME Enjoy dinner, continue conversations, and take in America's pastime from a club-level suite</p>	

Tuesday, July 18	TRACK ONE: Management Focus	TRACK TWO: Info Security/Tech Focus
7 ⁴⁵ AM	<p align="center">Sponsor Breakout: drill down, ask questions, and learn about solutions BAE Systems</p>	
8 ³⁰ AM	<p align="center">GENERAL SESSION: Emerging Cybersecurity Threats and Risks Ron Hulshizer, Managing Director-IT Risk Services • BKD, LLC.</p> <p>Ron will review and elaborate on certain ongoing threats and risks in the financial services industry and call attention to some of regulatory hot buttons bank should keep in mind to help manage their risks. In addition, he'll discuss ten best practices banks should adhere to. For the past 25 years, Ron has helped companies with information technology, security, and financial accounting issues. His primary focus is delivering cybersecurity and internal audit technology and IT services to financial institutions. Prior to joining BKD, Ron worked for technology firms and was responsible for financial and operational aspects including IT operations and data centers. He is a graduate of James Madison University; he earned a master's of business administration degree from Ashland University.</p>	
10 ⁰⁰ AM	<p>ROUNDTABLE: MANAGEMENT Facilitator: Chris Hill, SVP and CFO • Bankers' Bank of the West</p>	<p>ROUNDTABLE: INFORMATION SECURITY AND TECHNOLOGY Facilitator: Anne Benigsen, CISSP, First VP - IS & IT • Bankers' Bank of the West</p>
11 ³⁰ AM	<p align="center">LUNCH Reminder: CPF documentation will be available this afternoon</p>	
12 ³⁰ PM	<p>CYBER SECURITY: IT'S LIKE THE BRAKES ON YOUR CAR Stig Ravidal, Founder and CEO • Ravidal Inc.</p> <p>In this complex and rapidly changing world, community bank boards and executives need to think critically about cyber threats. Media reports of breaches make it clear that cyber security is not an IT issue: It's everyone's business. This session will focus on elements of a proven, practical program for risk mitigation that addresses current and emergent regulations. Stig will talk about the need for end-to-end risk management, third-party security, and incident response capability, and more.</p>	<p>REDUCING SECURITY RISK WITH PATCH MANAGEMENT AND TRUSTED EMAIL PROGRAMS D.J. Schleen, Security Architect • Ravidal Inc.</p> <p>This session will explore some of the top security concerns today and focus on how the bank can reduce its overall security risk by implementing trusted email and patch management programs. DJ will also discuss what motivates a hacker, how the threat of ransomware will influence security priorities in the future, and the top security attack vectors facing organizations right now.</p>
1 ³⁰ PM	<p align="center">CLOSING KEYNOTE: Cybercrime Exposed Brett Johnson, "The Original Internet Godfather" • Anglerphish Security</p> <p>Brett Johnson will discuss the latest methods of attack by online criminals and ways to best circumvent those attacks: phishing, defeating two factor authentication, ransomware, card-not-present fraud, and more. He speaks from nearly 20 years' experience in cybercrime during which he was instrumental in developing many online fraud tactics still seen today. Considered one of the best social engineers in the world, Brett was hired by the U.S. Secret Service as a consultant, informant and trainer upon his capture in 2005. After a subsequent crime spree, imprisonment, escape, recapture, and 7-1/2 years in prison, he took responsibility for his actions and turned his focus to helping others avoid the types of crime he used to commit. Brett's viewpoint and understanding of cybercrime unique and unavailable anywhere else on the planet.</p>
